Creating bullet charts (actual vs target) (40:37)

Combining views to create a dashboard (37:19)

Creating a survey analysis dashboard (40:37)

☰ Introduction

Tableau projects for data analytics and visualization is a project based course that targets students with an intermediate level understanding of Tableau.

At the beginning of every project you'll be given some data and a problem to solve, and through the instructor - you'll learn step-by-step on how to solve the problem.

Some of the projects you'll be creating in this project include;

- [Creating a business performance dashboard](#)
- [Creating a sales overview dashboard](#)
- [Creating an executive dashboard](#)
- [Creating a survey analysis dashboard](#)

[Read more about the projects here.....](#)

If you have any question(s) regarding a class, always leave it in the comments section.

All the best!
